Category: Cosmetics & Nutricosmetics

Type: Equipment

Olsa SAS presents its Minilab 3G dedicated to laboratories / R&D centers, both small and large in the cosmetics industry.

Specially designed to meet the needs of laboratories and research institutes, this new generation 3G Minilab with PLC / screen, allows to carry out tests, developments or even small productions in conditions as close as possible to those of industrial, pilot or semi-industrial plants. It is an 'All-in-One' equipment to be installed on a bench with its regulation and control of vacuum, heating/cold and 3 stirrings (3 tools with variable speeds), with the introduction of powders/liquids via a translucent lid.

We are a global specialty ingredient supplier to the beauty and personal care industry, dedicated to meeting evolving consumer needs, along with maintaining our commitment to sustainability and social responsibility. Known by our well-recognised brands, Alban Muller, Croda, Crodarom, Iberchem, Parfex and Sederma, we synergistically combine to offer a complete and total solution for manufacturers of products for beauty and personal care.
